EPA's Atrazine Announcement is an Attack on Science

By: Jim Zook, Executive Director, Michigan Corn Growers Association

An Environmental Protection Agency (EPA) draft report on the herbicide Atrazine is based on flawed science and could have a lasting negative impact on Michigan farmers. Atrazine is a chemistry that many of us have used over the past 50 years. This popular herbicide for weed control is used to grow the vast majority of corn, sorghum and sugarcane in the United States.

Atrazine has been carefully studied to ensure it is safe for humans and for the environment when used according to the label. It has been through extensive scientific testing with nearly 7000 different studies conducted during its 50-year history.

Atrazine is a chemistry that enhances weed control activity in many programs.

For example, the Corn Marketing Program completed research on Palmer Amaranth, a common weed that threatens corn crops. That research has shown that many herbicide program options achieve excellent control when atrazine is included.

Unfortunately, the EPA's proposed level for Atrazine application would make the product useless for controlling weeds in our corn crops. Atrazine has allowed farmers to combat the spread of resistant weeds and reduce soil erosion and fossil fuel consumption by using no-till farming practices. Not only would this be a major economic setback for farmers, but it would deal a serious blow to these conservation efforts.

Along with reducing options overall, removing Atrazine would be costly. The

alternative options are estimated to cost around \$30 more per acre, which will push many farmers out of profitability.

It's not just about Atrazine, it's about EPA ignoring sound science. It puts our whole food supply in jeopardy. The EPA should be following federal law that requires the agency to use credible scientific evidence when making these determinations. If Atrazine, one of the safest and most widely tested products, is on the chopping block today, what chemistry is next?

The EPA is accepting public comments until August 5 and it is imperative that every grower submit their comments. You will be receiving a separate mailing with instructions on how to comment, or you can call the office for more information. Additional talking points can be found at www.agsense.org

We need you to serve on the MCGA board!

By: Alvin Ferguson, President, Michigan Corn Growers Association

Dear MCGA Members,
The Michigan Corn Growers Association (MCGA) is seeking nominations for open board positions in the following districts:

Lapeer, Livingston, Macomb, Oakland, St. Clair and Wayne counties

- **District 7** – Representing Branch, Calhoun, Hillsdale, Jackson and St. Joe counties
- **At-Large** – Representing the entire state.

In order to appear on the ballot, nominations must be received by

September 01, 2016. All elected directors will hold the office for a term of three years. To be eligible for a seat on the board you must be a regular MCGA member in good standing.

We are in a critical time with issues like fighting to preserve the ethanol industry, pushing back against EPA overreach on a host of issues and securing trade deals that will open new markets for Michigan corn. Your service on the board will help make sure

Michigan corn farmers' voices are heard in Lansing and in Washington, D.C.

I strongly urge you all to consider running for a position on the MCGA board. Please contact Penni Sweeney at psweeney@micorn.org or 888-323-6601 if you would like to nominate someone for one of the above districts.

On behalf of the MCGA, thank you for all that you do!

- **District 1** – Representing Alcona, Alpena, Antrim, Arenac, Bay, Benzie, Charlevoix, Cheboygan, Clare, Crawford, Emmet, Gladwin, Grand Traverse, Iosco, Kalkaska, Lake, Leelanau, Manistee, Mason, Missaukee, Montmorency, Ogemaw, Oscoda, Osceola, Otsego, Presque Isle, Roscommon and Wexford counties and the Upper Peninsula.
- **District 2** – Representing Gratiot, Isabella, Kent, Mecosta, Midland, Montcalm, Muskegon, Newaygo, Oceana and Ottawa counties
- **District 4** – Representing Barry, Clinton, Eaton, Ingham, Ionia and Shiawassee counties
- **District 5** – Representing Genesee,

High-Octane Fuel: The Future of Ethanol

This April, representatives from Fiat Chrysler, Ford, General Motors and Honda renewed their call for higher octane fuels to be available on the market. Higher octane fuel will allow engine manufacturers to raise the compression ratio in their engines, which means more efficient engines and better fuel economy for drivers.

This technology will continue to be important as the big auto manufacturers work to meet the Corporate Average Fuel Economy (CAFE) standards that require them to improve overall vehicle fuel efficiency.

So why is this important to Michigan's corn farmers? The answer is that we are uniquely positioned to provide the octane that the auto companies are requesting, at a price that's cheaper than gasoline and with a product that is cleaner and more environmentally friendly.

Ethanol, which is made at five facilities in Michigan from corn grown on Michigan farms, is the highest octane and lowest cost fuel additive on the market. That means that as the auto companies push for higher octane fuel, they're going to be looking for more ethanol in our nation's fuel supply. This could mean an inclusion of up to 30 percent ethanol.

For the past several years, the Corn Marketing Program of Michigan (CMPM) has been working on expanding the market for ethanol. Two of the biggest pushes in this effort include:

- Being an active participant in the Ag, Auto, Ethanol work group. This group brought together leaders from the corn industry, ag companies, the ethanol industry and the major auto companies to envision the high-compression engines of the future and the high-octane fuel that will be necessary to power those engines.
- Working to install the infrastructure to be sure that the fuel will be readily available to power those engines. The CMPM received a \$3 million Biofuels Infrastructure Partnership grant from the U.S. Department of Agriculture, which we matched with contributions from CMPM, retailers and other organizations. That grant is helping to install new flex fuel dispensers across the state that will offer ethanol blends from E-15 all the way up to E-85.

Expanding the use of ethanol is a big market opportunity for Michigan's corn farmers, and it's largely due to our growers' investment in the CMPM that we've been able to push forward with this market development.

For more information about CMPM's work on ethanol or about the Biofuels Infrastructure Program, please visit our website at www.micron.org.

MSU Agriculture Innovation Day: Focus on Soils

August 24, 2016

Saginaw Valley Research and Extension Center
Frankenmuth, Michigan

Hear from experts and see the results of cutting-edge techniques on crop growth and soil quality. Learn about soil testing and plant diagnostics, academic programs and other MSU resources.

Participate in sessions focused on:

- **Nutrient management.** Enhance decision making about nitrogen usage and rates through technology.
- **Soil quality.** Improve soil quality, including the architecture of cover crops, extended rotations and interseeding.
- **Compaction.** See the effects of soil structure, controlled traffic and various tillage methods.
- **Tile technology.** Get an in-depth view of the movement of nutrients from the soil to tile lines.

MSU is an affirmative-action, equal-opportunity employer.

Rep. Iden climbs into the planter with farmer Ronnie Landis

Michigan Corn Growers Host Legislators for Spring Planting

This Spring, the Michigan Corn Growers Association reached out to growers across the state to host a legislator on their farm during planting. This was a great opportunity to get our legislators out to the farm, talk to them about Michigan farming and explain why we farm the way we do.

"Having that personal relationship with our legislators is so important when it comes to agricultural policy," said Jim

Zook, executive director of the MCGA. "Any chance our farmers have to talk to their legislators about what they do and why they do it will ultimately benefit our industry moving forward."

While at the farm, each legislator had the opportunity to ride along in the planter with the farmer and get an up close look at the new technology that our growers use on the farm every day to boost yields and protect the environment.

Continued on p.6

Farmer Matt Holysz drives Sen. O'Brien out to the field

Sen. Robertson preparing for his ride along with farmer Kyle Koester

Rep. Stamas helps farmer Clark Gerstacker load seed into the planter

Sen. MacGregor talks with farmer Tim Kruithoff about the history of his farming operation

Rep. Sheppard spoke with farmers John Secord and Gerald Heck about this year's outlook for corn

MCGA hosted 14 legislators across the state for this event, and feedback was overwhelmingly positive from both the legislators and the farmers who participated.

“Hosting Senator Pavlov during planting was so valuable in building our relationship and

establishing MCGA as his ‘go-to’ source for ag information,” said Matt Frostic, MCGA board member. “As farmers, we should take every opportunity to talk with our legislators about what we do. I highly recommend participating in programs like the ride alongs.”

Sponsorships Still Available for MCGA Events

We still have sponsorships available for our summer golf outings. These events provide you with valuable opportunities to personally interact with Michigan’s corn farmers and connect with them face-to-face. Our sponsorship team would be happy to speak with you about your needs and looks forward to working with you. To plan your sponsorship, please contact us at (517) 668-2676.

Hurry – don’t wait!

New Membership Benefit!

Membership in the Michigan Corn Growers Association (MCGA) means that you are a part of the only grassroots organization focused solely on the best interests of Michigan's corn producers.

We're excited to announce the following new member benefit:

MCGA members receive 10% discount at PFI Western Store when they use the promo code NCGA10. PFI Western Store is your one-stop shop for work wear, cowboy hats, boots and western apparel. It originated in 1975 as Preferred Farmers Incorporated, a dusty livestock feed and farm supply business located in Springfield, Missouri. Find them online at www.pfiwestern.com or call them at 800-222-4734.

In addition, we also offer discounts on many services and products exclusive to MCGA members. Please visit our web site at www.micorn.org for a complete listing of our many other membership benefits.

Congrat

TO THIS YEAR'S MCGA

Clay Daily

Clay recently completed his freshmen year at Oklahoma State University where he is double majoring in animal science and plant and soil science. Originally from Mayville, Clay will be interning this summer with Archer Daniels Midland and is hoping to continue working in agribusiness in the future.

Erica Gremel

Erica is currently a senior at Michigan State University and is majoring in crop and soil sciences. This summer she has accepted an internship with Winfield Solutions and hopes to use this and her other experiences at MSU to give back to the agriculture industry through her future job.

Alycia Drwencke

Alycia is entering her senior year at Michigan State University where she studies animal science and agribusiness management. After receiving her bachelor's degree, she plans to attend graduate school focusing on animal science with hopes to work in extension.

Madison Heath

Madison has recently completed her freshmen year at Michigan State University where she is majoring in agribusiness management with a minor in international agriculture. Upon graduation, Madison hopes to work internationally for an agricultural non-profit and obtain her master's degree in international relations and communications.

Jennifer Gentner

Jennifer has been dual enrolled at Ubly High School and Saginaw Valley State University her senior year. After graduating from Ubly High School, she plans to continue

attending Saginaw Valley majoring in business management.

Olivia Hoffman

Olivia will be entering her sophomore year at Michigan State University in the fall where she is majoring in crop and soil science. Her future goals include earning a PhD in agronomy while working in the field as an agronomist.

ulations

SCHOLARSHIP WINNERS

Erin Lauwers

Erin is currently a senior at Michigan State University where she is majoring in horticulture. Following her graduation this December, she plans to attend graduate school where she will focus on horticulture or entomology through research. Upon completion of her master's degree she wants to work in extension and potentially pursue a PhD.

Cassidy Polzin

Cassidy has recently graduated from Saline High School and will be attending Purdue University in the fall. She will be focusing her studies to become a production animal veterinarian through her major of animal science. She plans to come home to Michigan to work in a veterinary clinic after obtaining her master's degree and DVM.

James Parker

James is a recent high school graduate of North Branch High School. In the fall, he will be attending Michigan State University as a part of the Institute for Agricultural

Technology. After receiving his associate degree he hopes to return to MSU to obtain a bachelor's degree in crop and soil science and work in agronomy.

Katelyn Walters

Katelyn is currently attending Lansing Community College with plans to transfer to Michigan State University in the fall. At MSU she will be majoring in agriculture food and natural resources education with a minor in animal science. After completing her student teaching, she plans to become a high school agriscience educator and FFA advisor.

Amber Pickard

Amber is halfway through her senior year at Michigan State University where she is pursuing a double major in agribusiness management and accounting with a minor in agronomy specializing in food industry management. After graduation she hopes to become a CPA and work for an agricultural banking company in addition to farming.

The scholarship is open to MCGA members and children of MCGA members, including grower, student and associate members. More information about the MCGA scholarship program is available online at

www.micorn.org

Join us for dinner and a fun
night of racing at the first ever

AGRICULTURE NIGHT AT THE Races

Saturday, August 20, 2016

Berlin Raceway, Marne, MI

4:30-6:30 Dinner

Racing begins at 6:30

Super late models, modifieds

The event is open to all farmers but members of the organizations below will receive a complimentary ticket.

This new and exciting event is hosted by the Michigan Corn Growers Association (MCGA), Michigan Soybean Association (MSA), Michigan Cattlemen's Association (MCA) and the Michigan Pork Producers Association (MPPA).

For more information or to register please visit **www.micorn.org** or call us at **517-668-2676**. Space is limited so register soon.

Sponsorship opportunities are available!

The local cooperative. A farmer's second-best friend.

For as long as its valued members have been farming, the local co-op has always been by their side, supplying them with the expert services, essential products and market access they need to succeed. With today's rapid pace of change in agriculture, farmers depend on their co-op partner more than ever to help them grow and be profitable. Visit www.valueofthecoop.com for more information.

Claire White, Michigan Corn Intern, Graduates from Michigan State University

By: Claire White

As I started out at Michigan State University in Agribusiness Management, I had no idea what I was getting myself into. I had very little agriculture experience, but I knew that agriculture was something that I found very interesting. The coursework and opportunities that have presented themselves have taught me a lot about the industry. During my internship at the corn office I had opportunities to meet various farmers, industry representatives and other contributors to the industry.

My college career ends with me walking across the stage to receive my hard-earned diploma. This has been my ultimate goal and I can say with confidence that the Michigan Corn faculty have played a major role in preparing me for what is to come after my graduation from Michigan State University.

Upon graduation, I will be working for Meijer at a distribution facility dealing directly with produce. I am excited to have landed a job that allows me to connect with agriculture and consumers. Even with the excitement of starting a career, leaving Michigan Corn will definitely be bittersweet. I am extremely grateful for the opportunities I have been given through my internship and for the connections I have made with the people I worked with.

I would like to thank the corn growers, members, board of directors and staff at Michigan Corn for such a positive and rewarding experience for a young agriculture enthusiast like me.

*Photo by Jaime Curth –
Simple Moments Photography*

Meet our new intern: Ashley McAra

This summer, the Michigan Corn office welcomed Ashley McAra on board as an intern. Ashley is completing her first year in the agriculture technologies program at Baker College of Owosso. After she graduates with her bachelor's degree, she plans to attend a university for her Master's degree in

agriculture with a focus in either agribusiness or animal genetics.

Ashley grew up on a horse farm in Columbiaville. She and her family also raise beef cattle and hay. Ashley was an active member of Lapeer County 4H and Lapeer County FFA, which directed her career focus.

MCGA Announces New Frank Lipinski Scholarship

The Michigan Corn Growers Association (MCGA) board of directors is pleased to announce a new scholarship in memory of former board member and corn grower, Frank Lipinski. Frank was deeply passionate about reaching out to young adults with non-agricultural backgrounds. He made it a priority to assist those wanting to enter our

industry and educate young people about the various opportunities available in the agricultural industry.

The scholarship is geared towards full time college students who don't come from an agricultural or farm background. Participation in either the 4-H or FFA organization does not disqualify a student.

This new scholarship will be awarded for the 2017 spring semester with applications due Friday, November 4th, 2016. For more information or to apply for the Frank Lipinski Memorial scholarship contact Michigan Corn by calling (517) 668-CORN (2676) or via our website at www.micorn.org.

Carla Wardin and Barbara Siemen talk to dietitians and nutritionists about farming.

Michigan CommonGround Volunteers Talk Farming with Consumers and Nutritionists

This year, the Corn Marketing Program of Michigan launched the Michigan chapter of CommonGround. CommonGround is a national program that connects volunteer female farmers with consumers to have conversations about the food they grow and their farming practices. They share personal experiences, as well as science and research, to help consumers sort through the myths and misinformation surrounding food and farming.

To kick off this new program in Mid-Michigan, the CMPM brought the CommonGround booth to the Michigan Women's Expo in February to discuss everything from GMOs to hormone and antibiotic use in meat production. The booth was staffed by a group of farmer volunteers, including Melanie Block from Conklin, Janna Fritz from Bad Axe, Sharon Kokx from Hickory Corners. Brigitte Leach from Climax, Cathy McCune from St. Louis, Carla Schultz from Kingston, Barbara Siemen from Harbor Beach and Carla Wardin from St. Johns. Elaine Bristol from the Michigan Ag Council and CMPM intern Sydney Miller also assisted at the booth.

The conference was a unique chance to engage women and mothers and answer their questions about food. Giving consumers opportunities to speak directly with farmers is an important tool when it comes to boosting consumer trust and confidence in the food system.

In April, Carla Wardin and Barbara Siemen took the CommonGround booth to the Michigan Academy of Nutrition and Dietetics conference. They spent the day talking to 300 dietitians and nutritionists about farming and agriculture, including GMOs and hormones. These conversations not only help connect the nutritionists and dietitians directly with farmers, but they also help spread good information to every consumer that comes in contact with a nutritionist or dietitian.

CommonGround was developed by farmers through the United Soybean Board (USB) and the National Corn Growers Association (NCGA). You can find out more about the program online at www.findourcommonground.com. For more information about the Michigan chapter, or to volunteer, contact Tera Havard at (517) 668-2676.
